

The Great Deception

It is an appalling symptom of the reigning deception that the CDC would discount all adverse reactions within 14 days of the jab.

There can be NO CLEARER SIGNAL of the fraudulent nature of this "pandemic" and all its associated "measures" than this CDC policy.

It is the strongest evidence possible of their intention to deceive and mislead.

For THIS REASON evidence of this policy **must be preserved** - to always remind us of their true nature - and not be lulled into thinking that they are at all scientific.

Lets Look at their Report

Here is their report published August 27th 2021 -

<https://www.cdc.gov/mmwr/volumes/70/wr/pdfs/mm7034e5-H.pdf>

(A pdf copy of this historic proof of deception has been uploaded and preserved.)

And here is a table showing their published results. Notice the statements under the table where they say that people are considered UNVACCINATED within 14 days of receiving a dose !!

TABLE. Number of SARS-CoV-2 cases among persons aged ≥16 years, by selected characteristics and vaccination status* — Los Angeles County, California,† May 1–July 25, 2021

Abbreviations: ICU = intensive care unit; IQR = interquartile range.

* Persons were considered fully vaccinated ≥14 days after receipt of the second dose in a 2-dose series (Pfizer-BioNTech or Moderna COVID-19 vaccines) or after 1 dose of the single-dose Janssen (Johnson & Johnson) COVID-19 vaccine; partially vaccinated ≥14 days after receipt of the first dose and <14 days after the second dose in a 2-dose series; and unvaccinated <14 days receipt of the first dose of a 2-dose series or 1 dose of the single-dose vaccine or if no vaccination registry data were available.

† Among residents of Los Angeles County; excludes Pasadena and Long Beach.

Why Are They Doing This?

Perhaps you are wondering WHY they would do this? What are they trying to divert your attention from?

On the 15th February I published this study –

<https://web.facebook.com/groups/352273635911627/posts/460614675077522>

The study looked at 456 deaths following vaccination. If their deaths are completely unrelated to the vaccine then the date of their deaths should be randomly distributed relative to the date of the vaccination. There should be no clustering of death date around the date of the vaccination.

However, what emerged from the data was that deaths were highest immediately after the vaccination and decreased exponentially with a half life of 4 days – finally tapering out by 28 days.

Conclusion

The CDC has purposefully reassigned all deaths within the first 14 days after vaccination – to the unvaccinated – in order to COVER UP the extreme mortality rate immediately after vaccination.

It is a very bold and overt deception. Don't believe the LIE.
